About AbbVie

AbbVie is a global, research and development-based biopharmaceutical company committed to developing innovative advanced therapies for some of the world's most complex and critical conditions. The company's mission is to use its expertise, dedicated people and unique approach to innovation to markedly improve treatments across four primary therapeutic areas: immunology, oncology, virology and neuroscience. In more than 75 countries, AbbVie employees are working every day to advance health solutions for people around the world. For more information about AbbVie, please visit us at www.abbvie.com.

AbbVie's Commitment to Corporate Responsibility

We strive to make a remarkable impact on patients and drive sustainable growth by discovering and delivering a consistent stream of innovative medicines that address serious health problems.

In accordance with our Principles:

Transforming lives
Embracing diversity and inclusion
Driving innovation

Acting with integrity

Serving the community

Our Corporate Responsibility priorities are:

Using our expertise to improve health

Creating real health improvement is our mission and the premise of our business. To be a leading health care innovator, we must attract, retain and support a diverse workforce and invest in their efforts to develop medicines that bring value to patients.

Stewarding our ethical and sustainable business

We recognize that health is of fundamental importance to all people. To participate over the long term in the provision of health care, we must earn and maintain the trust of patients, health care providers, regulators, policymakers, and the public.

Supporting long-term community strength

The health of our business is intertwined with that of our communities. We can use our unique resources to support well-being, resilience and growth in the communities where we do business and help lay the foundation for broader community vitality.

2019 Highlights

Using our expertise to improve health:

ABBV-4083

had a successful end of phase 1 meeting with the U.S. FDA. A phase 2 study in patients with river blindness will be conducted by our partner, Drugs for Neglected Diseases *initiative*, with drug product and pro bono technical support from AbbVie.

89,000+

U.S. patients received AbbVie medicines at no cost through the myAbbVie Assist patient assistance program, up from nearly 81,000 in 2018. This program is just one of the ways AbbVie helps to expand access to our medicines.

Advancing our environmental sustainability priorities:

-16%

change in absolute carbon emissions (scopes 1 and 2) since 2015, more than halfway to our 2025 target of 25%.

24%

of our purchased electricity came from renewable sources, up from 9% in 2016 and almost halfway to our 2025 target of 50%.

10

new environmental sustainability projects were approved through our SPARK innovation accelerator, an incubator for employee-driven sustainability proposals.

Attracting and retaining a diverse and inclusive workforce:

48%

of management positions are held by women globally.

Ability at AbbVie

We introduced a new Employee Resource Group (ERG) focused on people with disabilities and their caregivers.

Supporting long-term community strength:

40,000 hours

spent by AbbVie volunteers in 50 countries contributing to communities during Week of Possibilities, our annual employee volunteer event.

\$13 MM

raised, including AbbVie Foundation matching donations, for community organizations during the 2019 U.S. / Puerto Rico Employee Giving Campaign.
